PRODUCT CARE

PRESERVED ROSES

1. Storage conditions

a. Temperature between 15 to 35 °C

b. Moisture less than 80%

2. **Color intensity** can last up to 6 months when displayed indoors (**no direct sunlight or fluorescent light**). For warehouses where roses are stored in boxes (**not light**), the color can last 18 months.

3. **Do not** submit to **drastic temperature changes** to avoid condensations.

4. **Do not mix strong colors**, they may combine.

5. In roses with stem, **it is not recommended to place a preserved sepal in a pastel colored rose**, it is better to paint it to avoid migration of color.

6. **White roses may discolor** other roses that are close, not necessarily in contact. (3cm apart)

7. Places with moisture changes, can **generate a tearing of roses and stems** when absorbing moisture and expelling the preservation fluids. When seasons change this effect is common, however, the rose or stem will reach a new balance and will be useful again, it's important to clean the fluids that may have been expelled.

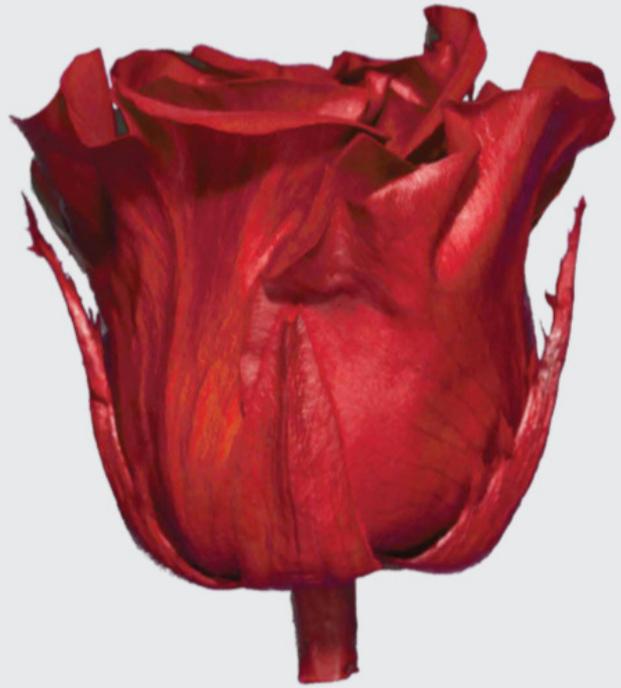

8. **To remove stains** on textiles, you can use alcohol and then wash them with Vanish.

Classic Shape

A simple, serious and beautiful rose at the same time, ideal for all kinds of floral arrangements for any occasion thanks to its variety of colors.

Romantic Shape

In all of its beauty, this garden rose gives you a feel of antique but new at the same time. Ideal to transmit the romance in your floral arrangements.
